

IPP Dual Component Equipment

The IPP Dual Component Spray Equipment is a high volume low pressure system. The equipment was designed to be used with the Instacoat line of Spray Grade products and a catalyst. The Dual Component equipment mixes the two components outside the gun and with the appropriate materials forms a monolithic membrane upon impact with the substrate.

Features

- Direct Drive System to eliminate down time to traditional belt drive systems.
- 9 HP Honda Motor for dependability.
- Application Rate: 1 Gun - Up to 1000 FT² hr / 2 Guns - Up to 2000 FT² hr.
- Can be run from a 5 gallon pail up to a 275 gallon tote with no additional equipment.
- Easy clean up.
- Can run up to 600 ft of discharge hose.

Included

- 200 Ft dual discharge Hose with hose protection.
- Spray gun with tips.
- Pump Rebuild kits.
- Intake hoses with drum bracket and strainers
- Electric Mixer with Paddle
- Tool Kit
- Spare tips and strainers
